

Product End of Life (EOL) Notice

(Notification of Termination of Tau Product)

To whom it may concern,

In order to focus on developing future products, Teledyne FLIR is announcing the end of life (EOL) for all **Tau** Longwave Infrared (LWIR) imaging cameras products. All **Tau** part numbers starting with 46, 47 and 48 are affected.

Teledyne FLIR released **Tau** in early 2009 to wide acceptance while setting a new industry standard. In 2016, Teledyne FLIR introduced **Boson** product family, once again setting the standard for low-risk, high-performance. SWaP optimized thermal cores. A significant number of Teledyne FLIR customers have successfully migrated to **Boson**.

The EOL will be tiered by detector type and lens. **Tau 2 336** will be terminated prior to **Tau 2 640**. Cameras with lenses will be terminated prior to the lens-less cores in both cases. For specific lenses, please reference Table 1. It is anticipated that all cores will be shipped within one year of order.

Teledyne FLIR has not seen significant demand for **Tau 2+** and has not been taking orders for the last year. This will also serve as the official notice that Teledyne FLIR will accept no further orders for **Tau 2+** as of today.

Teledyne FLIR understands that local laws, market conditions, and support requirements differ around the world and differ by industry sector. Therefore, Teledyne FLIR may offer custom support relationships that go beyond the End of Support Date. Existing customers can contact their Teledyne FLIR sales representative or support team for more information, and customers under contract will continue to receive support as agreed.
